

NOTES

OFFICE LOCATIONS

MV Engineering Company maintains offices in Cincinnati OH and Pittsburgh PA. Currently we have two engineers in our Cincinnati office and one in Pittsburgh, plus support staff in both locations. Most often we work in a regional area which includes Pennsylvania, West Virginia, Ohio, Kentucky and Indiana. We can generally reach your accident scene or vehicle storage location with a drive of 2 ½ hours or less.

MEET JEFF KRUMMEN

Jeff Krummen joined MV Engineering Company in the summer of 1999, and currently works in our Cincinnati office. He has two degrees in Mechanical Engineering, both obtained from the University of Cincinnati. Jeff would probably fit the description of a "gearhead", having grown up with a machine shop in the garage at home. He owns a Honda Accord on which he has designed and built the fuel injection system. He has also designed and built a roller coaster on a neighbor's property. Jeff enjoys the varied challenges found in the MV Engineering work environment, and has already testified on several occasions. He has been a welcome addition to the staff.

JEFF KRUMMEN

INNOVATIONS

In any technical enterprise, there is a constant need to upgrade both technical capabilities and personal skills. We have been at work in recent years to keep pace with advances in our areas of specialty. This has involved computer purchases and upgrades, a switch to Autocad drafting capability, adoption of Mathcad software for our technical analyses, and other innovations. We strive to keep up with technological developments while not getting carried away with fads and gimmicks.

IN RECENT YEARS.....

Our most recent newsletter was published in the summer of 1995. Frankly, there has not been another newsletter since then because we have had a few other things to do. Since the summer of 1995, our engineers have taken part in the following:

- q q q More than 2,300 analyses of vehicular accidents, fires, and similar incidents
- q q q More than 120 jury trials and 95 depositions related to these investigations
- q q q More than 32 seminars, workshops and conferences related to our business
